## ABOUT US

Hakisa develops user-friendly and effective comprehensive solutions to create, animate and notify family communities, communities of interest (associations, residences, cities, etc.) and caregiver communities. All solutions integrate connected objects.

With our Smart Home, Smart Care and Smart Service solutions, real estate professionals, actors of the Silver Economy and local actors can develop the access to their contents and services through a solution with their own branding or directly through the Hakisa Social Hub.

## WE SOCIALIZE THE INTERNET OF THINGS

We believe that the really smart technologies are the technologies that include human interpretation and interactions. Therefore, we develop a solution socializing connected devices.

We collect data of smart devices and push the information in real time to a private community defined by the user. The community can communicate and interact in case of need.

In order to ensure well-being and well-ageing at home, we work with reliable partners whose solutions focus on people and usage.

# THE HAKISA BUSINESS SOLUTIONS

We offer our business partners to create, animate, notify and monetize their communities through 3 offers:

- **Smart Home** for real estate professionals
- **Smart Care** for Silver Economy professionals
- **Smart Services** for local actors

All our solutions are user-friendly and can easily be adapted to every client's needs. The Hakisa technology is permanently evolving thanks to the feedback of more than 27 000 users.

## OUR REFERENCES

### **Facilien: the care hub**

Facilien adds personal care services and personalized assistance to the Hakisa technology. Facilien is adapted to the needs of seniors and positioned as a leading solution of the Silver Economy in Alsace.
